Oligarchy & Their Fronts, A Report with Dr. Joseph Farrell - Feb. 6

"The world is governed by very different personages from what is imagined by those who are not behind the scenes" ~ Benjamin Disraeli

By Catherine Austin Fitts

This Thursday, Dr. Joseph Farrell and I will continue our conversation on the "breakaway civilization."

To understand the breakaway civilization, it is invaluable to understand the Western oligarchies and the manner in which they have used inter-generational legal structures to govern resources for centuries.

Sovereign governments, companies, political parties, foundations and endowments – these are all mechanisms to organize and manage places, operations and assets. In one sense, these legal structures are “fronts” that live, die, evolve and morph over time. They are under the control of oligarchies and inter-generational pools of capital that constitute a “meta-governance” structure that has operated and evolved for centuries.

Tracing the evolution of post WWII Nazi networks, secret technology and financial wealth as these networks shifted from running a sovereign government to reintegrating into and realigning with the “meta-governance” structure serves as a very instructive case study in how the overall system works. It is also critical to understanding the roots of the US military industrial complex and the “breakaway civilization.”

Our goal is to understand the nature of the governance system operating today.

We draw on Dr. Farrell’s remarkable [series of books](#) on this topic, including

This is a topic which is hard to handle – the amount of disinformation involved is almost as mind-stretching as the topic itself.

My position on GMO’s is simple. There is fundamentally no GMO science. There is GMO technology. Just like there is really no weather modification science – just technology.

Just A Taste - An Equity Update

Get a "taste" of The Solari Report with this video excerpt from last week's report:

"So in essence, 2013 can be summarized as a strong year for the U.S. stock market investors. Big gains were realized in this 5 year of the cyclical bull market that we're in. As January goes, so goes the rest of the year, and if we look back, January of 2013 was up by 5% so it's no surprise that 2013 was as good as it was."

Highlights from Last Week's Report

"The correction that we saw that started in May of 2011, the market fell 21.58 percent and lasted 108 trading days. Now that we have that as a reference point, what I wanted to really point out on this is that the worst decline that we experienced during the entire 2013 was just a 7.52 percent decline, and it lasted only 22 days."
