

THE SOLARI REPORT

INTRODUCTION

Welcome to The Solari Report.

Today is June 15, 2016. Recording on Wed this week, leaving early for Idaho tomorrow am.

I am Catherine Austin Fitts and I am delighted that you could join me this evening.

EVENTS –

Heading to Switzerland and Lake Constance in Southern Germany the second half of July, with one-day trip to Amsterdam. If anyone wants to have a lunch in Zurich, let me know!

THEME TONIGHT: Can We Stop....? You name it

Hearing too often – nothing we can do. NOT TRUE. False flag, vaccines, yes, we can stop these things. First we have to see them for what they are – and bring momentum to transparency - and then reverse the game.

From recent post “Mirror Mirror on the Wall, Who is the Fairest of Them All”

“Unfortunately, G-7 governments did not bring enforcement to bear after the financial coup d’etat. Instead, they simply asked for their cut of the profits to fund more government regulations on the innocent. With insufficient transparency, including the circumstances described by Edward Snowden, the market has also not enforced. So what we are left with is a general population that has lost faith in the establishment, in the government and in the financial system, and a robber baron class dependent on ever-greater amounts of dirty money and force.”

This is where false Flags come in

False Flags:

Orlando – False Flags

Five Shooters vs. Staged?

Alleged shooter worked for British Security firm G4S, who bought Wackenhut. FYI 25 minutes from their US HQ and Trump’s Palm Beach estate.

Moral of the story of:

Marketing more centralized control, including gun control

Story line wrapped around official story as opposed to real story

No effort to ascertain facts

No discussion of US military killing allies in Syria with friendly fire – WSJ Saturday headline

Gallup Polls – why Terror works – support for government, taxes, more money for security, more money for IT done by security companies

Reality is opposite – less money for security, more money for IT, less money for private armies, less gun control – reduce number of government agencies that

can carry weapons and make arrests or apply civil money penalties

Home grown terrorist = more money for surveillance and intelligence ie more money for Lockheed, Dyncorp, G4s = larger professional corporate mercenary army.

More push for gun control. Note no one was carrying so who ever was running the op had a clear path. Was a security guard outside. Op was done in a place that served alcoholic beverages – Florida law specifically outlaws carrying a concealed weapon.

Orlando – pulse club 11 miles from Lockheed HQ on Orlando– Lockheed – long cooperation with Disney. Lockheed executive once complained to me that they created the technology, gave them to Disney and Disney got all the credit.

If everyone starting looking and researching all the corporate HQ and installations where false flag happened, and connecting the dots, large corporations would work hard to make sure they were not in their area – a first step.

Alexander Hamilton said a “well-regulated militia” would help safeguard the freedom of the new republic because it would make the creation of a professional, mercenary army “unnecessary.”

We are headed in opposite directions. The more we fund this stuff, the more false flags we will have.

Negative Return on Investment Economy players are desperate for next fix – more they get, the more productivity is harmed. Enormous and growing tax on society.

Money and Markets

Tuesday – Yields on 10 German bonds went negative on Brexit fears.

Fed announcement – no increase. BREXIT a factor, employment figures. Indication is one increase for 2016.

Bilderberger – meeting in Dresden. Precariat? Push for Gun Control? Related to Orlando shooting? Really want gun control so they can cut SS, pass TPP, address pensions and reengineer state and local government and privatize more local things, including schools

Guns are standing in the way of harvesting what remains of local economies

Let's look at the market

US Dollar Index -4.06%

AGG +4.32

TLT +13.32

IEF +6.51

GLD +21.0

SLV +25.40

\$CRB 8.78%

Business Goes Into Lockdown as profound political change looms – from the Guardian

As if to underscore all these uncertainties, Ben van Beurden, chief executive of Royal Dutch Shell, now Britain's largest company by far after its recent merger with BG Group, has announced a series of measures for living with what he calls "[a lower forever environment](#)" – that is virtually permanently low inflation, low demand, and low interest rates.

Ben Van Beurden, the chief executive of Shell

In an effort to sustain the dividend and revive the share price, he's further slashing costs and investment. Investors had better hope he succeeds. Shell plans to pay dividends of around £10bn this year, or an astonishing £1 for every £7.50 in total dividends paid in the UK, according to estimates by Capita Asset Services.

This marks an alarming degree of income dependence on just a single management team operating in what green campaigners view as an industry heading for terminal decline. They could be right. Shell is reducing investment by a further third, which is not exactly a vote of confidence in the future.

Nor is Shell alone. Globally, oil and gas investment has been slashed by \$600bn in the past 18 months alone, with no let up in sight. Across the extractive industries as a whole, which historically account for a very high proportion of all capital spending by business, the damage is more extreme still.

CAF: THIS IS THE ECONOMIC DISADVANTAGE OF CENTRALIZATION AND MANAGED MARKETS

Speaking of unhealthy centralization.....

Microsoft announced purchase of Linked in – Deleted Account – if everyone did the same, would it bust the sale?

WSJ: Talent War Rages in Car Industry – example of jobs issue. Unfilled jobs rising – split in skills. Current curriculum’s – absolutely not aligned with where demand for skills is going to be. Make sure you and loved ones are engineering that alignment – don't wait for schools to do so.

Federal appeals court upheld net neutrality rules. Good news for Netflix and Google. Bad news for TV and cable.

Consumer spending reported as up – I don't believe it – inflation in health care, food and gas expenses. Multiple reports from around the country that Obamacare has indeed wiped discretionary incomes...and the slow burn continues.

Two Reviews:

[Book Review: The Profiteers: Bechtel and the Men Who Built the World by Sally Denton](#)

Bechtel – exceptionally important part of the Deep State

[Book Review: "We Have Dared to Be Free" by Dr. Dady Chery](#)

Interview published in two week – excellent description of disaster capitalism by US and Clintons

HERO

Hero: The Mothers From Vaxxed

Astonishing testimony.

Cost to a household of a severally autistic child – \$5MM

You can figure out how to homeschool. Cost to all members of household of homeschooling is much less than the cost of 1 severely autistic child

Add data issues – See Jane Robbins video on common core data collection.

ASK CATHERINE

Hi Catherine,

This is not a question; it is in relation to your discussion with the Saker. I thought you might find the following link interesting. Perhaps it helps us understand why the neocons “hate” Russia.

My first attempt at the link failed, but it does work.

This. Was planned a while ago <http://stateofthenation2012.com/?p=22223> As you pointed out, we need not be afraid, but we certainly need to be aware. We need to be wise as serpents, and harmless as doves.

Speech by Friedman/Stratfor about creating a middle zone between Asia and Europe

I am a Stratfor subscriber. I find Friedman's books and speeches very useful to help understand US thinking. Very good insight into the role of geography.

Dear Catherine:

A friend of mine in the UK is concerned about the upcoming Brexit vote. He believes that the only way the powers that be would clear the path for the Brits to leave the European Union, is because they must have something much more sinister and controlling in mind. What's your opinion on this?

No idea. Anything is possible. Only way to know is to see what emerges in a learning system. Could include reconfiguring into Northern European group.

Dear Catherine:

You mentioned that every child with autism represents a \$5 million cost to their family and to society throughout the child's lifetime. As morbid as this may sound, this means that for every additional child who gets autism because of pharmaceutical vaccines, the pharmaceutical industry now reaps tons of additional money off of the many drugs administered to that child during their lifetime, because of

having induced that autism...

Don't know the figures. I doubt the goal is for the pharmaceuticals to make money. Strategic goal decided far above that level. Talk about momentarily.

Let's Go to the Movies

In addition we discuss my review of the documentary [*Trace Amounts*](#), this week's choice for *Let's Go to the Movies*. *Trace Amounts* was recommended by Robert De Niro and addresses the topic of mercury poisoning, including from thimerosal, a preservative sometimes used in vaccines.

INTERVIEW

Inspiration: CIRCLE DISCUSSION

**Meaning of the statistics – autism is an epidemic –
statistics are meaningful**

**1-40 going to 1-2/80 boys – African American multiples
greater chance – CDC specifically suppressed this.**

Integrate these numbers with:

GMO impact on fertility

Push for women leaders

Nanoparticles in food and heavy metals in chemtrails

**Talking about fundamental reengineer of human DNA
and depopulation.**

**Epidemic – widespread impact on society – expense to
schools, health care, personal happiness**

Fundamental

*“Oh my God. I cannot believe we did what we did. But we did.” ~ Dr.
William Thompson, CDC Senior Scientist & Whistleblower*

By Catherine Austin Fitts

Publicity regarding the new documentary [*Vaxxed: From
Coverup to Catastrophe*](#) has stirred the political cocktail created
by heavy schedules of vaccines, vaccination mandates and the
rising levels of autism in children, particularly boys. Among
other things, *Vaxxed* tells the story of the CDC scientist Dr.
William Thompson, who confessed that the CDC had
omitted crucial data that revealed a causal relationship
between the MMR vaccine and autism. We hear estimates that
by 2032, if current rates continue, one out of every two
children – and 80% of the boys – in America could become
autistic.

This is an issue that is great concern. **If 1 out of 60 children
today in America becomes autistic, that means**

potentially millions of children, marriages and household financial security are being harmed or destroyed domestically and globally. We need to reverse the rising trend, not let it continue.

Vaccination mandates are a subset of an astonishingly inhuman assault on health freedom. At some point one has to ask, are we humans or livestock? US government health care policy appears driven by the notion that our bodies are their property and private interests are free to dictate and experiment, as they like.

Several months ago, my Solari Circle began a discussion about how to communicate with loved ones about the risks of vaccines, particularly heavy schedules of vaccines. We decided to review existing materials and to discuss different approaches to communicate with loved ones about this sensitive topic.

One question that arose was how to help people who have been injured by a toxic vaccine. That is a great question. What do you do when you or someone you love has an adverse reaction to a vaccine? I invited Dr. Laura Thompson, founder of the Southern California Institute of Clinical Nutrition, to join me this week to address the question. As luck would have it, Laura has just seen a showing of *Vaxxed*, including a Q&A with the film makers and a participating mother, and gave us a review.

CLOSING

June 23 – Soft Revolutions with Wayne Madsen

June 30 – Haiti & Disaster Capitalism with Dr. Dady Chery

July 07 – 2nd Quarter Wrap Up News Trends & Stories with Dr. Farrell

Until June 23

Please remember, don't worry about whether or not there is a conspiracy. If you are not in a conspiracy, then you need to start one.

Good night and good luck.
