

THE SOLARI REPORT

INTRODUCTION

Welcome to The Solari Report.

Today is July 14, 2016.

I am Catherine Austin Fitts and I am delighted that you could join me this evening.

EVENTS –

Zurich and Lake Constance in the second half of July, with day trip to Amsterdam on the 26th
lunch with Catherine

[Lunch with Catherine in Amsterdam on July 26, 2016](#)

THEME TONIGHT: The Old Headline Switcheroo

Dallas = IMO 99% chance false flag

Change in consciousness last week = American AND global citizens fed up with Washington and US corporate media – threatens ratings and tax flows threatens currency status

“Our enemies do not fear us and our allies do not respect us”

Multiple goals of Dallas:

Get Washington off front page
Terrorism = general population desires government
Federal police = override Sheriff jurisdiction = central
control
Gun Control

Another reason for you to pay attention to local elections and
to get to know your local Sheriff and local police.

Increasing number of violations of the constitution. This will
come down to a local issue in your county and municipality.

Bigger question:

Government is unreal
Ex: Dallas Memorial Service – George W. Bush having a
meltdown on drugs/alcohol – mind control programming
breaking down
Covenant is real

Nurture the covenant

From the blog:

["Divide & Conquer" Antidotes](#)

To My Fellow Citizens...

Catherine, Daily Musings, News & Commentary on July 13, 2016 at 3:07 pm · No Comments

*"We hold these truths to be self-evident, that all men are created equal, that they are endowed by their
Creator with certain unalienable rights, that among these are life, liberty and the pursuit of happiness."* ~
The Declaration of Independence

By Catherine Austin Fitts

What binds us together? First and foremost it is a commitment to the covenant we share. That covenant is in our hearts and minds. It is the basis of our culture and our law. The formal law means nothing without it.

The world is full of forces that would tear us apart. Don't let them. Yes, shun the lawless. But hold the covenant in your heart and uphold the law to protect the lawful.

And why should you be lawful when those around you are not? Because the law can not be destroyed by government, nor by the lawless. As John Adams said, "the Revolution was in the hearts and the minds of the people."

Government officials are behaving like a criminals. Bankers are behaving like criminals. But in the hierarchy of our reality, these people come and go. They are not the source of our covenant, nor are they the source of our power.

Our freedoms come to us by divine authority. As the Declaration of Independence also clearly states, "Governments are instituted among Men, deriving their just powers from the consent of the governed."

Our current government is like [Kipling's servant](#) who has run wild:

THREE things make earth unquiet

And four she cannot brook

The godly Agur counted them

And put them in a book—

Those Four Tremendous Curses

With which mankind is cursed

But a Servant when He Reigneth

Old Agur entered first.

Government does not have the power to destroy our covenant. **Only we can destroy the covenant and that is what we must not do.**

I am alive today because hundreds of people insisted on obeying the law despite multiple efforts and repeated orders to frame me by the richest, most powerful people in the world. Hundreds of people insisted on the law. Because they were committed to the covenant that we share. Because it was in their character. It cost some of them their jobs. Some took great risk.

I tell you that the law is alive – it continues to live in the hearts and the minds of the people. That is what counts. That is what is worthy of your attention. Ignore the criminals. Invest in the people around you on whom you can count.

Yes, corruption is rampant, but that does not mean that you and I must be corrupt.

Debasement is everywhere, but that does not mean that you and I can not strive to be excellent.

My dear friend Thomas Hupp always says "the bigger the breakdown, the bigger the breakthrough." There is a lot that is breaking down around us. That is because it needs to break down — it is not working.

Whatever is being born begins with the covenant that we share – with our commitment to freedom and to individual rights.

Our individual choice will come down to this – free or slave. I tell you freedom is worth everything. Freedom starts with nurturing our covenant. Freedom is worth living, fighting and dying for no matter what the cost.

So that freedom will flourish, let's nurture our covenant to protect and honor our individual freedom, rights and responsibilities.

"Therefore all things whatsoever ye would that men should do to you, do ye even so to them." ~Jesus Christ, Sermon on the Mount

My kids started playing that for the first time yesterday. By 9pm, having visited every park and historical site within 5 miles of the house, I took their phones away. It's electronic crack. And, yes, I think it was invented by the CIA. I'm not kidding you, it was CREEPY watching people walking around the local park, every single one of them nose to the screen, playing this godforsaken game. Not just the usual "nose to the screen" thing so many people do these days. I'm talking full, intense concentration to the point they were stumbling over and bumping into things. And they just kept doing it anyway.

They were like ZOMBIES. Nobody talking to eachother. Nobody looking up. Just doing a slow walk around the place, phone in hand, almost dead silent.

Catherine-

I presume you've already seen this news. Looks like 5G is getting fast tracked. Email below from Josh del Sol of Take Back Your Power. It strikes me as a big step towards Technocracy and Transhumanism. But yet a small enough step that not enough people will take action.

Untested 28GHz radiation blasting from millions of new hidden antennas and tuned-up "smart" meters. A corporate free-for-all, with oversight eliminated. Total, for-profit surveillance. An "internet of everything" with "hundreds of billions of microchippable products". Everywhere and everything... and eventually, *everyone*. This is not sci-fi. This is FCC Commissioner Tom Wheeler's insane new plan, slickly badged as "5G".

SPEAK UP AND STOP "5G":

<http://www.parentsfor safetechnology.org/stop-5g-spectrum-frontiers.html>

The government's own NTP cancer study inconveniently concluded that yes -- cellular radiation DOES increase cancer. Now, the industry-lobbyist-turned-government-czar gave an uber-creepy speech invoking technocracy's endgame with a stomach-churning sense of urgency.

Check out Wheeler's creepy speech for yourself, [here](#). He stammers through it like a man mostly-possessed. This is desperation on their part. They know full well that the next phase of the megalomaniac rollout needs to happen before the SHTF for them, and the tipping point is reached in terms of a convergent awareness of wireless health / surveillance / technocratic insanity

— and their liability.

So let's engage and make some noise. Your voice is needed today. This plan is being fast-tracked & **voted on tomorrow, Thursday July 14**. Let the FCC and this government know that if they do not listen to science and reason, **they will be held accountable and liable for their actions**. Money is not only their god - it's their language.

SPEAK UP AND STOP "5G" NOW:

<http://www.parentsfor safetechnology.org/stop-5g-spectrum-frontiers.html>

Light it up, Josh del Sol

ps. This one is heavy. Hang in there. It is darkest before the dawn. But in the night, act we must.

pps. So it's handy when you contact the FCC & reps, here once again is a list of science-based resources:

1) 34 Scientific Studies Showing Adverse Health Effects From Wi-Fi: <http://wifiinschools.org.uk/30.html>

2) Several thousand studies that indicate a biological effect and/or harm: <http://www.powerwatch.org.uk/science/studies.asp> <http://www.justproveit.net/studies> <http://www.emf-portal.de> <http://stopsmartmeters.org.uk/resources/resources-scientific-studies-into-the-health-effects-of-emr/>

Dear friends:

The "Word" has been embedded (or blatantly stated) in "Independence Day Resurgence"

wherein the last line of the movie is:

"Let's go kick some alien butt."

A good alien arrives to open the movie and we make the error of destroying it out of fear that it is the return of the previous aliens of 20 years ago.

The core of that good visitor survives and provides the key and knowledge to our entire future in space and how to destroy the evil "Queen" inside the massive enemy spaceship who does in fact return and proceeds to annihilate civilizations.

The movie calls for the global unity needed to repel the common enemy.

Our lady president consults with world leaders and then makes the final decisions.

When the administration is wiped out in Cheyenne Mountain, a general is sworn in as Pres.

Much unity is on display:

we are led by a Chinese American general at the moon base; a Chinese young lady is a hot pilot and the love object of a young American;

The "hive mind" meme is demonstrated.

A black American and a white American heal their differences and save each other's lives.

The conclusion is obvious:

good aliens are helping us defeat the bad ones,

and

as a main character says at the end

"Let's take the fight to them."

Off we go into the wild black yonder of space to make the universe safe for

????????????????????

Hi Catherine,

I've never heard you say anything really about the pentagon and where the money goes and understandably so. There is a fine line between an activist and a traitor as we come closer and closer to a war which I've fought so desperately to avoid through awareness that I find myself pulling back on a number of issues. One of those is to be less critical of some of our militaries position

4 trillion missing money
SSP 2014 + SSP 2015 = federal budget
PRODUCTIVITY - \$1 trillion a year on weaponry
Strong defense = reserve currency
Kind of people in the military

Catherine, What do you think of California transformation of a huge budget deficit to a budget surplus? Here's a link to Bill Maher's comments: <https://www.youtube.com/watch?v=BtNbMD96xgY>

Maher on taxing upper income groups

More complicated

Disagree with Maher – NASDAQ/Silicon Valley and Asian inflows vs commodities being way down – not a particularly informative comparison

No doubt – taxing policies are serving the rich and inequality – corporate vs individual

some thoughts ... and a YouTube I would like to share with Katherine...

YouTube

<https://www.youtube.com/watch?v=HjUrWdo07xg&feature=youtu.be>

Katherine,

just some thoughts about THE BIG PICTURE you talk about in your Wrapup of 2015... Space base economy etc...

This YouTube or any listening of Thomas Campbell and Bruce Lipton together... I believe this was in April 2016... gives a good idea about the BIG PICTURE and where all of this is going.

The question is: Will human race wake up in time and CHOOSE LOVE as a basic criteria for our personal CHOICES or are we going to CHOOSE FEAR? If we choose FEAR like we're well on the way of doing... (that's why terrorism

is soaring)... well... we might not make it!!!

Posted the video – importance of seeing the FIELD – listen to SR with Lynne McTaggart and Dr. Tiller – would like to get Lipton on

Catherine,

First, I want to thank you for your audio recordings for your subscribers, such as I. I just finished listening to you and Joseph and it resonated with me completely. I have followed the changes of this world for many years, but now it is very difficult as a Pastor's wife and teacher of the women and children in our church family. I honestly just don't have time to follow the world changes as I use to. Because of Solari.com I'm able to stay connected and I thank you for that. For me your audio recordings are the most valuable because I can only spend time with you as I'm winding down for the evening in darkness next to a sleeping husband.

Since we have been in Mexico for the past few years we have had a profound repetition of the same question from the Mexican people. They truly understand that what happens in the US eventually trickles into their country. We've repeatedly been told this trickle use to take 15-20 yrs, but today it is happening at an alarming rate of 2-5 yrs. The people here do not like what they are seeing in the US and as Joseph said in your audio, these people are hard workers, family oriented and to add, they are God fearing. But, this is changing. They fear greatly that the family values are deteriorating, women rather than being home and their focus being about their husband and children, there is a feminist arrogance in the attitude of women. Disney is everywhere down here like an idol. The younger Mexican people look no different than Americans. They are losing their culture, their values and their spiritual way of things. It is like a panic in the people when they see the craziness of what is happening in America through their media outlets. The christian and religious people no longer desire what America has to offer them and their children and they are turning to us to give them hope that the bad values and actions happening in my country won't come to their country. I certainly can't promise them it won't happen, but it does seem to be coming here at the speed of a freight train and no one is talking about it or trying to help the Mexican people. It's as if the deeper government that is bent on destroying my country has stretched out their filth to Mexico and will do the same here. Do you talk much about what is going on down here in Mexico or is this country of no significance in the Mr. Global agenda.

Just a side note: When we came here a dollar got us 10 pesos. Now it has almost doubled, it is at 18.51 pesos to the dollar. It is good for us, but not so good for the people here. And when the oil prices tanked a while back, it was amazing the swiftness in rental amounts that changed here. We went from 25,000 pesos for a house a month to 12,000 pesos a month in less than 10 months. A lot of homes went vacant for that 10 months when the oil platforms in the Gulf of Mexico started cutting back.

I don't know if you are already aware of what I've shared, but I wanted you to hear it from someone who is living it in real time. Also, the media down here is portraying Donald Trump as a crazy person and Hillary Clinton as a criminal who will win the presidency despite all that. When you mentioned it would come to two choices running; a crazy person vs. a criminal and if the criminal wins than crime pays... I said to myself, we're there. God

help us all. Save those who need saving and keep those who are saved faithful to sharing the gospel of Jesus Christ. Amen.

I'm so happy you are a speed reader, because I just realized this went long.

Take care and I pray for you often.

DEBASEMENT PROCESS – digital media, powerful entertainment content and
entertainment

Some will be immune – some will not

Have to be prepared to nurture and help those who are not

See my post: To my fellow citizens – applies to all of us globally. SEE THEY LIVE

Hello- Do you anticipate government confiscation of precious metals?

I think our corrupt government is capable of anything.

Thanks

Already doing so using currency debasement. I think confiscation of precious metals is unlikely, although possible. Note GATA letter. Manipulation of IRAs is possible. Bank regulation and low interest rates – confiscating bank deposits and fixed income as we speak.

Dear Catherine:

You've mentioned that the total amount of the bailouts exceeded \$27 trillion. How would you have handled the situation instead, and walk us through what would have happened differently by utilizing your approach.

r
Depends – if I was in the situation, I would have had access to more information. Depends on what that information showed as well as what I could get the military and intelligence community and the G-7 leaders would support me in doing.

Dear Catherine:

With Donald Trump and Hillary Clinton being the presumptive

nominees, how much impact will the powers that be have in determining which one will become President?

A great deal.

Dear Catherine:

I greatly enjoyed meeting with you and other Solari subscribers at the "Lunch with Catherine" event that you held here in Southern California a few years ago. Have you ever considered hosting either a one-time or an annual multi-day Solari conference, where we could travel to a specific location to hear both you and other speakers, while also networking with wonderful, like-minded Solari subscribers?

Given our experience to date, lunches work, workshops and conferences are problematic. That is why I like SSP – hope they have a 2016.

Dear Catherine,

In the past I have viewed the Rambus report and I have to say with my knowledge of finance and mathematics I am simply not able to make much sense out of the report.

If I got his view on gold right, it seems to me that he did not get it "right" because gold is up. Right?

Not necessarily – he called the 2011 – he has been tracking this up and investing in PMS

And my question/request is:

Could you please do a bit of translation of what his data show that "none-educated" financial subscribers can get a sense of it too?

Thank you!

Will do!

INTERVIEW

Space and technology

Series on robotics, AI and digital systems.

[Book Review: The Hacked World Order: How Nations Fight, Trade, Maneuver, and Manipulate in the Digital Age](#)

Explosion of value creation – and value destruction.

“My high octane speculation for today reiterates something I’ve suggested in many previous blogs: with the commercialization of space comes the inevitable necessity of protecting those national assets, but with the mining of space and local celestial bodies like the Moon, comes the necessity of protecting those assets, and the “sea lanes” to them. And that requires not only the need to re-position American assets currently available further out, it also requires new military-space assets to be positioned further out. One can even go so far as to envision “seleno-synchronous” orbits for satellites around the Moon, and occupying various layered orbits between the Earth and the Moon. If this reading of these stories be correct, then this means the USA and China – and therefore inevitably Japan, India, Europe, and Russia – are about to embark on a massive increase in space-related activity, both military and commercial.” ~ Dr. Joseph P. Farrell, May 17, 2016

By Catherine Austin Fitts

We continue our publication of the **2nd Quarter Wrap Up** this week with **News Trends & Stories, Part II**.

Last week, in **Part I**, Dr. Farrell and I covered *Economy and Financial Markets* and *Geopolitics*, including a serious discussion

of Brexit. This was a very timely discussion. Dr. Farrell and I believe that Brexit reflects the British establishment preference to move the United Kingdom and the Commonwealth to a more independent role in a multipolar world. The latest headlines — Washington tensions, Putin's warnings about the buildup towards war, Tony Blair's defense of his Iraq record, and the NATO buildup in Eastern Europe, including British troops moving into Estonia and Poland — affirm the soundness of the British strategy. The world does not need Iraq II, let alone World War III.

This week in **Part II**, Dr. Farrell and I will cover *Science and Technology* and *The Big Questions*. This part includes a discussion of the explosive global investment in space exploration and the space-based economy, including some of the incredible stories that defined what is happening in space this year.

Make sure to check our web presentation for the complete listing of *News Trends & Stories* for the 2nd Quarter. Log in and access it through your subscriber links.

Stay tuned for the final two parts of the 2nd Quarter Wrap Up in the third and fourth week of July:

- **Financial Market Roundup:** In the third week, we will combine a written Blockbuster Chartology from master technician Rambus with my Equity Overview. Make sure to check our web presentation for the complete roundup of financial market charts as of June 30.
- **Productivity, Prosperity & the Popsicle Index:** Finally, our big theme. How do we blast through the

Orwellian BS about productivity coming out of folks like Alan Greenspan? How do we get down to what needs to be done and integrate dazzling innovation with real human productivity and prosperity? We will post our discussion of the “real deal” on productivity and prosperity in our final week.

Please make sure to e-mail or post your questions for *Ask Catherine!*

Talk to you on Thursday!

CLOSING

July 21 – Blockbuster Chartology with Rambus/2nd Quarter Equity Overview

July 28 – 2nd Quarter Wrap Up Productivity, Prosperity & the Popsicle Index

August 04 – Solari Food Series

Until July 21

Please remember, don't worry about whether or not there is a conspiracy. If you are not in a conspiracy, then you need to start one.

Good night and good luck.

+++++

Appendix

Jeffrey Smith was celebrating too early. Even he, after years of dealing with the tapeworm, does not have a sufficient understanding of the real deal - the power of control files, the deep state - the imbedded corruption in the corporatocracy. The ability of the S personalities to come up with ways to navigate and manipulate the system to basically get what they want under the guise of giving you what you want.

This GMO labeling bill that the Senate passed has destroyed the ability of States to make policy on labeling, has made true disclosure at best inconvenient and at worse impossible, has obfuscated the definition of GMO's enough to provide significant loopholes for the industry rats to crawl through, has once again reaffirmed the power of wealth and power and force to subvert justice and sacrifice the health and welfare of the citizenry and tax payers.

The system is broken and needs to be replaced - and that system is allowing others to enslave you for trinkets because taking personal responsibility is inconvenient.

The voters were listened to and their interests were subverted one more time - and the media is hard at work with the cover stories. Yeah!!!
