

THE SOLARI REPORT

INTRODUCTION

Welcome to The Solari Report.

Today is Thursday, November 30, 2017

I am Catherine Austin Fitts and I am delighted that you could join us this evening.

[Give The Gift of the "Solari Report"](#)

This Christmas season we invite all Solari Report subscribers to give someone special a free, gift subscription to the Solari Report.

This subscription will include:

- *2017 Annual Wrap-Up* report starting on January 5, 2018 and running through the month, reviewing the top stories of 2017 and the major trends that will affect our lives and finances this coming year; and
- *Annual Equity Overview*, reviewing global markets and the major trends that will effect financial markets in 2018, and
- *News Trends & Stories* with Dr. Joseph Farrell
- 1st Quarter Solari Reports, including the next *Emerging Multipolar World*, the *Precious Metals Market Report*, and more.

Complete with detailed supporting web presentations and transcripts, these are Solari Report favorites!

The person of your choice will receive access to all subscriber resources and the Thursday Solari Report, to end on February 26, 2018.

THEME TONIGHT:

Big Sky Country

Drove over to Amarillo in the Texas Panhandle last week to visit with a subscriber and her family. This was a beautiful Thanksgiving dinner with a wonderful family. The day after Thanksgiving, drove around the Northeast part of the panhandle to learn more about the ranching world on the Panhandle and how the land is recovering from the fires last Spring.

This is Big Sky country – just like the Great Plains I drive across when I drive to Montana. I love the feeling of great size and openness.

Right after returning to Hickory Valley, Boone Pickens announced his is listing his 65,000 acre ranch (we drove by it) for \$250MM – lots of pictures on the WSJ and Internet for those who like Panhandle as much as I do.

As we drove back to Amarillo from the Panhandle – red and orange sunset spread its colors across a large cloud formation across the sky – It was unspeakably beautiful.

I have driven more than 500,000 miles across America over the last fifteen years. What I can tell you is that it is such a beautiful place. If you have not yet had the chance to get out and see it, I hope you make time to do so.

My Thanksgiving was a reminder that this country is still filled with wonderful people still.

Go find the beautiful people and places. They are everywhere.

BULL MARKET IN EVERYTHING

Coast to Coast last night

Stocks, bonds and precious metals

Only commodities down – is bottom in?

After lock in the year at 12/31 – are we in for a real correction?

No doubt markets helped by promise of Tax Reform

Big test of market depth – SIEMENS AG

BERLIN—Siemens AG, the German engineering conglomerate, is readying the most significant step yet in its yearslong restructuring: the listing of a big chunk of its health-care business, estimated to be worth up to \$47 billion.

TAX REFORM

Senate still working through amendments – will pick up on amendments starting tomorrow at 11am

the Joint Committee on Taxation said the bill would not fully pay for itself via higher growth and would leave the government facing a revenue loss of around \$1tn over 10 years.

the Senate parliamentarian, an independent official who polices compliance with legislative rules, said Republicans could not use a so-called “trigger” mechanism they wanted to deploy to reverse some tax cuts if revenues fell short.

Could vote tomorrow or next week – essentially 2 more weeks before adjourn

Give 70% chance of getting it through – McCain has said he will vote yes.

Dow soars 300 points as chances of Senate tax bill passing increase with McCain support

<https://www.cnbc.com/2017/11/30/us-stocks-dow-record-high-tax-reform-senate.html>

Potential hold outs – Corker (TN), Flake (AZ) Johnson (Wisconsin) and Collins(MAINE).

Corker – deficit

Johnson – small business

Collins – property deduction

Still need to do a Short Term Funding Resolution

I have a lot to say on tax reform – will postpone majority until we have a final bill. Last I checked was over 500 pages.

Important points:

1. % OF GNP DIVERGENCE – Corporate revenues up dramatically as a % of GNP, % of taxes has been falling steadily – this will continue the divergence.

Bernie Sanders - In 1952, corporate America paid 32% of all federal taxes. Today, despite record breaking profits, they pay less than 10% and one out of four large profitable corporations pay nothing in federal income taxes.

Jim Carroll: In a few days there's going to be this international colloquium. And this place'll be crawling with rich and powerful people, the world's leading business people and politicians.

Johnny Worricker: What, four days in the sun and they conclude that global recovery depends on their making more

2. Bring capital back into the country – money will go for stock buybacks, automation and acquisition (EX- AT&T and Time Warner –

Need Middle Class revenues – comply with fiscal Rules

Reshore money, people and operations – rebuild your US manufacture and military base

Go fast with big guys – much more centralizing

Lower corporate taxes to bring trillions back in
to engineer rebuild of North American

CEOs: acquisitions, Automation and Stock buybacks

Not use it for anything that creates human jobs

Only small business will do that – which is why someone like
Senator Johnson is making such a fuss.

More jobs for software developers and robotics engineers

3. What happens when the corporate infrastructure and
Republicans lock in what they want?

THIS IS MY CHIEF CONCERN:

Tomb Raider - “Well I guess they got what they came for”

Example: Credit Reform in 95-96

Poll Support 29% - 21% don't know

What happens what they get what they want – remember

LOWER BOOM AFTER GET TAX REFORM AND 2018
ELECTION

Attack - #1 RACE WAR - Target welfare, food stamps

Divide and Conquer – try to start a race war

Positioning people

Black Lives Matter – Soros and Bitcoin

Drug Gang – blockade story – will they be encouraging this

Highwayman Robbery by drug gangs

Kingsman Technology

Attack #2 GENERATION WAR

Cut off elderly – they know history, law, experience, survival skills

Attack:

Medicare and Medicaid

Beware heaving programing on race and generation related to these issue

MAKE IT HARDER FOR PRODUCTIVE

Net – corporations make more money, carry less taxes and the middle class and individual have to pay for the externalities of corporations

Example: AT&T

Example Harvard Corporation

CONGRESS – PASS SHORT TERM RESOLUTION IN NEXT 2 WEEKS

US – 18 shut downs to date

With funding set to expire in one week, Congress is scrambling once again to avoid a government shutdown.

House Speaker Paul Ryan, R-Wis., insisted Thursday that lawmakers would pass a short-term resolution to keep the government running at current spending levels past Dec. 8, when the existing funding measure is set to expire.

In *Let's Go to the Movies*, I will review *Dark Tower* a new action movie that explores inter-dimensional realities of good and evil and the roles of hope and faith in the triumph of goodness.

Not a great movie but an interesting exploration of good and evil and inter-dimensional force – something worth thinking about

Stable fields protect us from inter-dimensional forces – when change comes, fields tear apart. And we are called on to deal with them more often and more directly. Which is why it is so important to be very discerning about who and what you invite into your life.

INTERVIEW

JO IS BEING NICE – THE POLITICIANS ARE GOING TO START AGGRESSIVELY PULLING THE RUG

“In health there is freedom. Health is the first of all liberties.” ~ Henri Frederic Amiel

By Catherine Austin Fitts

This week on the Solari Report, attorney and author Jo Kline returns to discuss the “perfect storm” ahead in health care and her own new book [Health Literacy](#).

Jo has studied and written about the multiple challenges we face in managing our health – demographics, economics and ever increasing government, corporate and financial institution regulation and control. At the same time, the availability and interest in more economic natural methods is exploding, just as innovations in health technology and science are growing rapidly as well. This creates a highly complex health care ecosystem – full of opportunities, contradictions and new risks. Unless we each learn to navigate this environment with care, we could face life and death consequences.

I asked Jo to join me to help communicate the importance of becoming a health care “prepper.”

In *Money & Markets* this week I will discuss the latest in financial and geopolitical news. Please e-mail or post your questions for *Ask Catherine*.

ASK CATHERINE

Hi Catherine,

I hope you can play the audio of Donna Brazile - from her book signing in New Orleans the 18th. It's a very interesting talk. Hearing her there and reading her book - I have become a great admirer.

She told me that she does not believe that Seth Rich was killed during a robbery attempt. She did not say who she believes is responsible for his murder, but she obviously was deeply affected by it.

RESPONSE

I listened to the audio. Thanks for sending.

I will leave you to admire her. I am glad she wrote the book.

IMO, she rose to power like a lot of well educated African Americans on a sea of affirmative action money and programs while helping or helping provide the air cover for the Clintons and the democrats to engineer drugs into black communities, private prisons, housing bubbles, more subsidy from government to big corporations and central control.

There is a new class of highly subsidized African Americans delighted to profit from the genocide of their people.

I have little use for them. I was having dead animals left on my door step, trucks running me off the road, people breaking into my house, tapping my phone and using electromagnetic weapons trying to stop me from warning people and stopping the corruption and protecting innocent people being rounded up for prison (read slave

labor camps) while trying to create legitimate jobs in those neighborhoods while she was getting rich helping Clinton and Gore engineer all the things I was trying to stop.

At some point, you are going to have to stop admiring criminals and start holding public officials accountable for their actual actions.

We hate the housing bubble and narcotics trafficking and mind control technology, but we love the people who engineered it and marketed it.

What is the chance that Uranium One is a Putin sting on Hilary?

Unlikely

Dear Catherine, Whatever you do DON'T, REPEAT, DON'T waste your time on the Kingsmen sequel. Compared to the previous film, it's an unwatchable, unholy, awful mess!!! Whereas the previous film bullseye'd the alleged covert capabilities of wireless entrainment technologies in a very dramatic fashion, the second film redirected the focus from invisible energetics of mind manipulation and behavior modification deployed by economic scions of the system back to the low-tech and familiar chemical and coercive methods of control deployed by remote rogue elements. It seems the second film was a deliberate unwinding of the successful narrative and sick satisfactions of the first and displays an almost cartoonish disdain for any sort of real world relevance. While there may be some interesting crumbs dropped for the intrepid, in my estimation, the film is most interesting for what

it omits. If omission is the new standard by which we are forced to judge content then we really have stepped into a dystopian totalitarian system. I'm grateful for truth tellers such as yourself who help keep our truth radars properly tuned. Best Regards,

HAVE PROMISED TO SEE IT – and have not yet. Came out for streaming 2 days ago.

Do you know who got Qaddafi's gold?

NO – assume it was split up among US and the allies that supported the operation - but my guess is the French are mad about the price they paid. Integrating the cost of immigration and brand problems, that was the highest price per ounce the French ever paid for gold.

Only thing I ever agreed with Tom Friedman on – the Libya invasion uncorked Africa. One of the greatest humanitarian tragedies – take the richest country in African and simply destroy it. That is what the need for subsidy by the unproductive with weapons looks like.

Hi Catherine,

Dr. Laura Pressley was a candidate for Austin City Council in Texas in 2014. She currently has a suit against the state of Texas for election fraud. Sofia Smallstorm did a wonderful interview with her a couple of months ago. This election fraud case is a landmark case which is likely to have national ramifications if Dr. Pressley wins. It is currently set to be heard in the TX Supreme Court and the TX atty general has filed an amicus

brief. The values that Dr. Pressley advocates are very much in line with the concepts of the model that small towns espouses. Thank you,

Katherine: Thank you for another fantastic interview with Richard Dolan. Your contrasting approaches to the search for truth makes for a very deep and complementary analysis. I was surprised though that you both did not mention the recent massive number of sealed indictments that have been issued and what could this possibly mean.

A possible clue to actionable intelligence is the recent Sarah Westall interview with former CIA case officer Robert David Steele. <http://sarahwestall.com/deep-state-take-down-ww3-indictments-zionist-info-war-with-robert-david-steele/> I am asking you now what is your opinion on Robert David Steele? Thank you again for your courage to uncover truth and sharing your wisdom.

We did not comment because they are under seal. Don't know. No one else does except the related prosecutors and grand juries. My guess is that many in the grassroots in the Bush-Clinton drug cartels (including Mexican drug cartels) needed to be retired – again the financial coup is over and the leadership and personnel you need to engineer the theft is different that what you need to reinvest. If you are going to bring back major corporate

investment, then you need a safer environment in the places where you are locating that investment.

Lots of the big deal being made about the indictments is HOPE PORN OR FEAR PORN – ignore until we have facts.

**Explain HOPE PORN – fools you into not taking action
The good guys are coming, the good guys are coming.**

FEAR PORN is “the end is coming, the end is coming”

The end is not coming, but your end will if you don’t stop wasting your time on fear porn and hope porn

Steele is not someone I use as a source. Better retired CIA offices, including Ray McGovern, Kevin Shipp, and NSA Binney, Tom Drake, Kirk Wiebbe

Hi Catherine,

I hope you are having a blessed Thanksgiving with loved ones. I had a couple questions but first I wanted to thank you for sharing Richard Nolan’s series on False Flags. I’ve watched the entire series and shared it with couple of friends. It is extremely well done and presentable to others. Everyone that I’ve shared it with has received it well and had good things to say about it and Nolan. I look forward to listening to your interview with Nolan when it is released.

Now, my questions. I am looking into Multiple Wave Oscillators (MWO) at the request of my mom, who has been

fighting cancer and now has other serious health issues (likely from the ‘treatment’). I don’t have any serious expectations for a device like this to cure my mom, but I am curious if there is anything legit about them or is it a total scam. I’ve got a book on how to build one myself and I’ve seen expensive products like this one(<https://biocharger.com>). However before I invest a substantial amount of time or money into this, I was wondering if you had any insight or could point me towards reliable sources on the the subject. I’ve heard you speak about EMF radiation, mind control technologies and some frequencies being more harmonious with life than others, so I’m curious if you could share anything you know about the subject.

I have Quantron Resonance System – will probably buy a new system called Pulsed Harmonix that I want to try as soon as I have time to focus on it.

Also, I’ve heard you mention several times now that you believe there is a push to have churches replace their wooden doors with glass or metal. Can you explain why this is and why you are against it? Does it have to do with EMFs or its more of a spiritual thing?

One: There is a woman named Kate Noble running for mayor of Santa Fe next March.

Have a wonderful Thanksgiving and a grateful blessing as a subscriber.

THANKS

Catherine,

Happy thanksgiving to you. I am forwarding this to you because this subject is concerning to say the least. I also follow Martin Armstrong and his models are showing we are heading into a mini ice age which appears to say food shortages will be front and center.

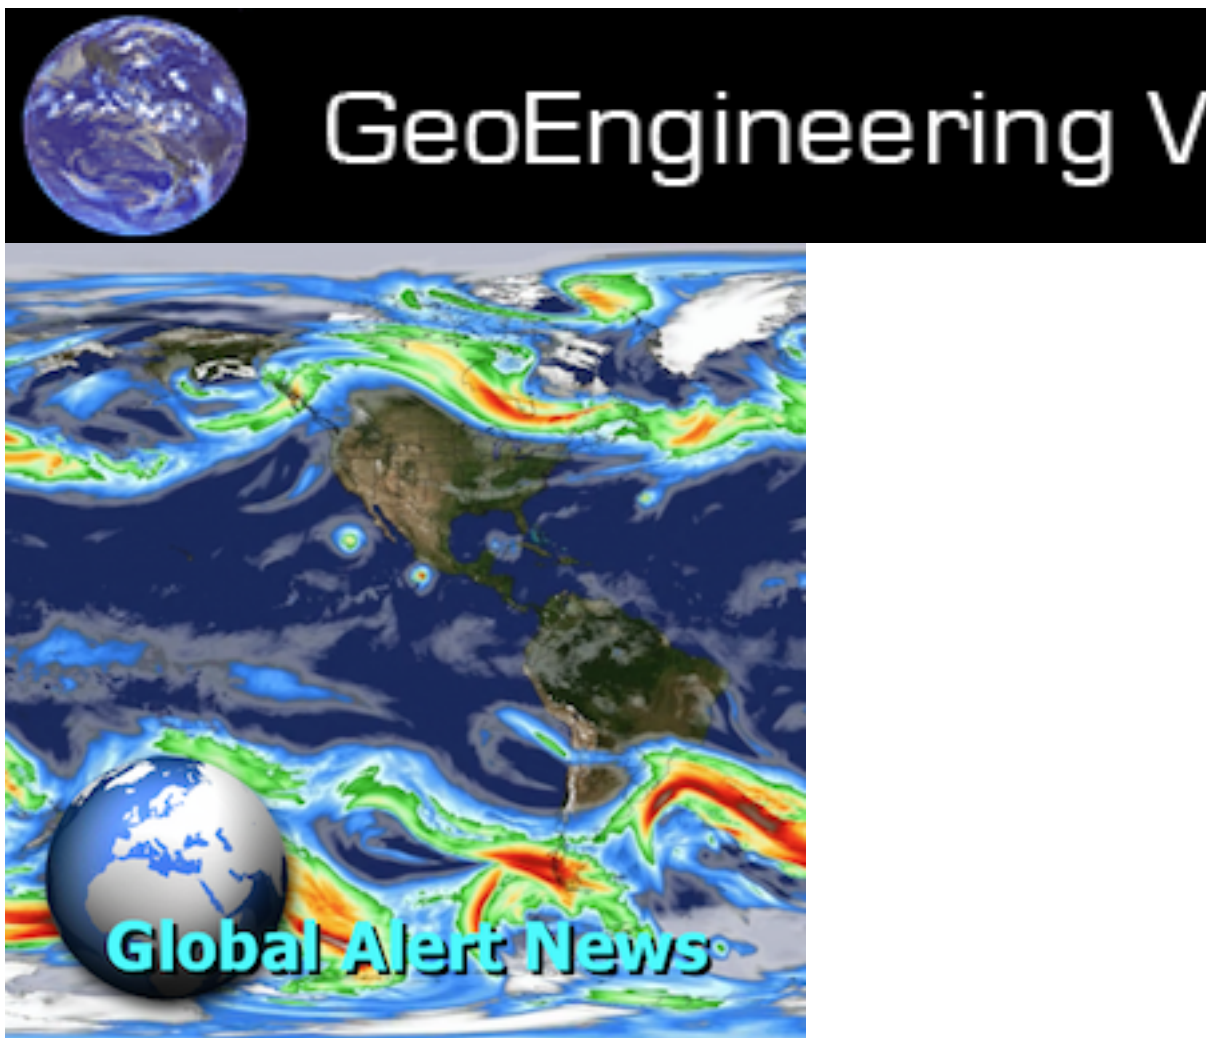

How will this effect markets and what is your opinion of how we survive this cycle?

You are an amazing person and I thank God I found you.

Don't know if this is true or not – so much weather manipulation hard to say what is really going on Look at post called **THIS DOES NOT CHANGE EVERYTHING**

I think food has been front and center globally– See 2016 Annual Wrap UP on the Global Harvest – pressure in dollar market share, more automation means falling incomes and rising foods costs.

Food availability will be front and center in developed countries as well.

Geoengineering Watch Global Alert News, November 18, 2017

Deception and devastation are the calling cards of the cabal that runs the world. While an unfortunately high percentage of global populations are still pretending that bigger picture events are not their concern, they will soon discover just how small the world really is. The November 18th installment of Global Alert News is at the link below.

What can each and every one of us do to make a difference? How many are willing to actually try? If not now, then when? LONG E- MAIL ABOUT GANG STALKING – NOT GOING TO READ THE WHOLE THING

This is a follow-up email to the email that I sent previously about the video “Gang Stalking and V2K Testimony by Private Security Whistleblower.” I mention my thoughts about the whistleblower and also try to suggest some possible forms of protection. My hope is that something mentioned in this email can help other targeted individuals.

I have listened to several additional interviews with the whistleblower, and he has said that once he became a whistleblower, they turned all the technology against him, and he started experiencing the V2K and electronic torture. If someone is experiencing V2K and electronic torture, I think it is challenging to give an interview with the same natural demeanor as someone who is not experiencing V2K and electronic torture. I think that this whistleblower is extremely articulate, and that's why he's able to even give the interviews at all. I wouldn't expect him to have the full picture of what's happening as he was not a CIA operative or someone high up in the program, but I do think he is credible and I think he offers a valuable perspective. In any case, I've found his information to be extremely validating, as I became an unwitting participant in the mind control experimentation happening in Seattle. I've experienced noise harassment, stalking, hive mind programming, street theater, electronic torture, break-ins, vandalism, food poisonings, and DEWs.

In my case, new neighbors moved into the apartment next door to me. At the same time new landlords came as well. It was after this that the harassment started. The whistleblower has written about entire apartment management companies being involved, and I think that's true. At least in my case, I think the new landlords were involved as well as the new neighbors.

START HERE

I am new to the whole targeted individual scene and am still trying to come up to speed on what can help. If it weren't for the solari website, I would be totally in the dark about the whole targeting phenomena and the extent of what's possible with

mind control. But because I had seen articles about it at solari.com, I realized what was happening and was able to act sooner rather than later to try to protect myself.

THAT IS GOOD NEWS

The following video given by the same whistleblower discusses some shielding tips (beginning at 10 minutes).

https://www.youtube.com/watch?v=qH08jK8x_8U

His discussion of making a roll of repelling magnets has helped me immensely. I haven't tried the copper sheeting yet, although I've heard other targeted individuals recommend that as well.

I notice that the whistleblower's website mentioned in this video no longer has any information on it – all the information has been removed. But it looks like some of the interviews are still available on youtube.

For a video about making the repelling magnets, see

https://www.youtube.com/watch?v=iIoM0_VNyP0

(I don't always agree with this guy's commentaries, but he seems to have figured out some helpful stuff.)

Be sure that the ceramic magnets that you get are polarized with one side being negative and the other side being positive (perhaps you can test it with a compass before buying). I bought some ceramic magnets from Walmart which had the positive and negative forces spread throughout and when that's the case, you don't get the strong repulsion. The ceramic magnets I

bought from Home Depot (made by www.magnetsource.com), however, worked really well.

Another helpful interview is with Dwight Mangum (interview starts at 13-1/2 minutes).

<https://www.mixcloud.com/saturdaynightpodcasttips/episode517-dwight-mangum/>

He is an electronics engineer who focuses on the importance of grounding and creating interference. The interference can be created by using a very strong magnet. The grounding is important to help you avoid the induction that can happen when you walk through the fields of your house. He thinks that one of the things that is happening is EPR (electron paramagnetic resonance) in which the free radicals in the body are being inducted to create some of the negative effects. When you ground, you reduce the amount of free radicals in the body.

http://privatewww.essex.ac.uk/~svist/lev1/What_is_EPR.shtml

He also describes a method of cloaking oneself in a car which he says minimizes the V2K while driving. I haven't tried this yet.

I think it's possible that different people are being targeted differently. In addition to the EPR mentioned above, I have read that there are 3 types of attacks: microwave, scalar waves, and sonic weapons. Each one needs to be defended against differently. Metal can help with microwaves. Magnets can help with scalar waves. And silicon can help with the sonic/vibrational weapons.

I found the following video on shielding to be very helpful:
<https://www.youtube.com/watch?v=b9vKOh2quks>

In this video, NSA whistleblower Karen Stewart talks about things that have helped her. I tried the silicone oven mitts that she recommends, and this has been helpful. After getting help from the silicone oven mitts, I bought silicone baking sheets. I think these will be easy to sew into a garment.

Bryan Tew has some suggestions that I think are helpful, like listening to music that you like. He says that your brain will entrain to the music rather than to the mind control frequencies that are being broadcast.

I bought a portable Blushield a few weeks ago, and I carry it in my pocket. I would say that it does not help with the electronic torture, but beyond that, I'm not sure of its effect. But the theory behind it sounds good, and I can only think that it must be helpful.

One of the things that I experienced with the mind control in Seattle was the hive mind that Bryan Kofron has mentioned in some of his interviews. This is quite a freaky feeling as, whenever it has happened, I have felt a presence inside my head. I also experienced thoughts being sent to me that I knew were not my thoughts. I realized that I was losing my ability to control my thoughts and that it wasn't safe to stay in my apartment. I moved as quickly as I could. Things were good in my new location for a couple of months, but then I started experiencing the hive mind at times (plus break-ins and DEWs). At some point I discovered that if I put my laptop into sleep

mode, the hive mind feeling started to dissipate. Another time, when I felt the hive mind, I got under one of those camping blankets that has metal on one side. I continued to use my computer under this blanket, and the hive mind dissipated. This makes me think that perhaps something was being transmitted in the microwave range to my computer (like a hidden wifi network? Or something from a cell phone or cell phone tower or drone?), and the metal blanket was blocking the signal.

So far, my experience of the hive mind has been the most frequent in Seattle and not as frequent in other places. I'm guessing only some people in Seattle have experienced this, and most have not. This makes me think that the hive mind requires some sort of initial individualized programming to setup in a subject. Perhaps they need your EEG or some frequency related to your DNA so they can target a specific person. I think the proximity of the perpetrators to my apartment made it possible for them to use technology to induce this state in me. And once they have you programmed, this state can be activated again in the future. But I wonder if they are prototyping a system that can be used on a larger scale.

I really hope someone (like Melissa and Aaron?) can delve deep into this area of hive mind so that we can learn how to protect ourselves from it. Perhaps if we all share different pieces of the puzzle, we can create a coherent picture of what's happening and how we can best protect ourselves.

NEXT QUESTION

Just listened to Control 101. When will we get a Solari Report (or book) on growing up in a "rough neighborhood," which was clearly preparation for what was to come, and get the details of how you and God teamed up to fight the evil of the litigation? We understand if you are reluctant to reveal such intimate details, but they are an essential part of the message you appear to have been born to deliver. You are the only public person who is making the connection between the material and the divine in quite this way, and this story needs to be told.

Dear Catherine,

I am catching up on Solari Reports, just listened to 3rd Qtr Wrap up Part I. I was surprised at (what I thought were) your positive comments on Schauble, and wonder if you read the article in the Guardian back in 2015. Do you think it is historically incorrect? The picture I get of Schauble from it is a man to be feared, not respected. There are others who have written quite favorably of him, but his push for privatization of Greek assets seems to coincide with the historical information

on him in the Guardian article. Did I misinterpret your comments?

Sorry I forgot to include this link:

Best of the Solari Report

Please remember, don't worry about whether or not there is a conspiracy.

If you are not in a conspiracy, then you need to start one.

Good night and good luck.
